

3. When the user clicks on the Create Task button on the Contact Record page, confirm what should be the subject, due date and description of the task. Once the user enters all the details create the task and assign it to the Contact record owner. (**User Should not enter due date in the past and the length of the subject to not exceed 20 characters**).

FLOW:

RESULT:

A screenshot of a web form titled 'Create Task'. It contains four input fields: 'Subject' with the value 'Follow Up', 'Due Date' with the value '10-Mar-2024', 'Description' with the value 'Hello Salesforce', and 'Status' with a dropdown menu showing 'Not Started'. A blue 'Create task' button is located at the bottom right.

When I Enter Invalid Data its shows Error

A screenshot of the same 'Create Task' form, but with invalid input. The 'Subject' field contains 'Follow Up the contact' and has a red border with the error message 'You have Entered More than 20 Characters' below it. The 'Due Date' field contains '08-Mar-2024' and has a red border with the error message 'You have a Date in Past' below it. The 'Status' dropdown menu shows '--None--'. The 'Create task' button is still present at the bottom right.

- In this Screen flow, In each of the data type in screen I have Valid Input Option to validate the Input details entered by user.
- For Due date, `{Due_Date} >= {!$Flow.CurrentDate}`.
- For Subject, `LEN({Subject}) <=20`.
