8.Create a Screen flow to create "Contact" and place the screen on home page with optional with optional file attachment.

FLOW:

*RESULT:*

Case 8 create contact with or without file

* First Name

* Last Name

Phone

Email

you@example.com

☐ Do you want to upload file ?
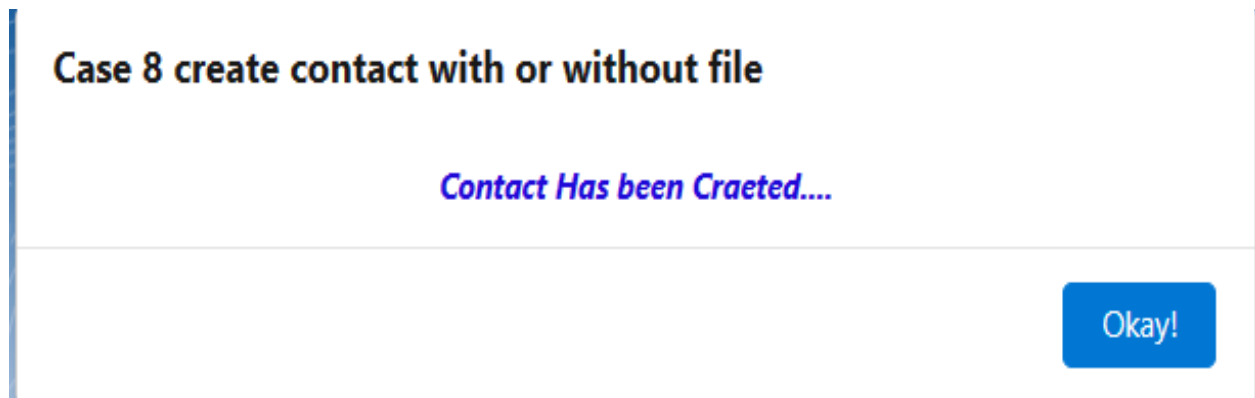

Pause   Done!

- ✕ In this Screen flow, I have first created a Screen to capture the first name, last name, phone, Email ,then I have created a variable to store the contact id so that we can relate the upload file to contact id.

- ✖ Then I have created a decision element, whether the do you want to upload file is checked or not, if it is checked then go to upload file screen or finish the flow.

Case 8 create contact with or without file

Upload A File

⬆ Upload Files   Or drop files

Pause   Previous   Next

- ✖ Then I have created a Last screen to show that Contact is created successfully.

Case 8 create contact with or without file

Contact Has been Craeted....

Okay!
