# 9. Create a screen flow to create the following records Contact or Opportunity or Case which is related to Account record.

FLOW:

- ☺ In this Screen flow, in the first screen element I have used the picklist filed to select Contact or Opportunity or Case to Create.
- ☺ Then I used the decision element to check whether it is Contact or Opportunity or Case.
- ☺ If it is Contact, it will go the contact screen and capture the value entered by user and create contact record and related it to account.
- ☺ For relating to Account, I have created a variable to relate it to account.
- ☺ If it is Opportunity, it will go the opportunity screen and capture the value entered by user and create opportunity record and related it to account.
- ☺ If it is Case, it will go the Case screen and capture the value entered by user and create case record and related it to account.

I Have Placed Screen flow in Account Record Page....

If it is Contact, it will contact screen......

Account
Acme Restored
